ONLY FIRST-CLASS  
Upholstery and Mattress Work

BY

F. A. Robbins, - - - 49 Islington St.

Send me a postal and I will call and make estimates.

LOCAL BASE BALL.

The Maplewoods are trying to get the Exeter Clippers down here for a game.

Two picked vines from this city will contest at Hampton Beach this (Thursday) afternoon.

James Goodrich held Newick in excellent style at Dover on Labor day, playing with the Father Matthews team against the Central Parks.

Ira Newick will probably leave for Dartmouth on Friday afternoon, in which case, of course, he will not pitch for the Christian Shores on Saturday. Frizzell or Kehoe may go into the box.

PORTSMOUTH DAY.

Today (Thursday) will be celebrated at Hampton Beach as Portsmouth day. Many of the stores in this city will close and a big crowd of Portsmouth people will undoubtedly pass the day at the beach.

Sports have been arranged, including a base ball game this afternoon. The annual band tournament at Hampton will also take place today, making an additional attraction. At half past five o'clock a grand concert will be given by the consolidated bands, numbering about two hundred musicians. The evening will be devoted to dancing.

WITH RANK OF CAPTAIN.

The president has made the following appointments in the navy: Joseph Foster to be a Pay Director with rank of captain; Real Frazar, to be a Pay Inspector with rank of commander. Edmund W. Bonafon, to be a Paymaster with rank of lieutenant; John D. Barber, to be an assistant paymaster, with rank of ensign.

ROWE-TILTON.

Popular Portsmouth Young Man Weds One of Raymond's Fair Daughters.

Edwin F. Rowe of this city and Miss Bernice Tilton of Raymond were married at the home of the bride's parents, Mr. and Mrs. J. N. Tilton, on Wednesday, the 4th inst., at high noon. The ceremony was performed by Rev. A. N. Thompson. The bride was attired in white peau de soie, with point lace trimmings, and carried a bouquet of American Beauty roses. The groom was dressed in the regulation black dress suit. The Episcopal service was used. The couple were attended by Miss Lora Rowe, sister of the groom, and Asa Tilton, brother of the bride. Miss Rowe wore pink and white monsoline de soie.

After a wedding breakfast the couple quietly slipped away to a carriage in waiting and were rapidly driven away to a neighboring station, where they boarded the train for Buffalo, while their friends were waiting at the Raymond station to meet them with the customary rice and old slippers, very much discomfited at their defeat. In the meantime the newly-wedded pair were whirling away to the Pan-American. They have the good wishes of all in their new departure in life.

Among the numerous and costly presents were the following: Silver tea service, from the parents of the bride; an oak dining table and chairs, brother of the bride; half dozen solid silver teaspoons and point lace handkerchiefs, Lora Rowe, Portsmouth; parlor clock, Mrs. Rowe and May Rowe; one dozen solid silver teaspoons and four table spoons, Col. G. H. Tucker, New York; half dozen sterling silver forks, Amphon orchestra and May Butterfield; pair solid silver tablespoons, Mr. and Mrs. John Eaton; pair solid silver dessert spoons, Harry Upton, Manchester; red satin sofa pillow, Battenburg lace butterfly covering it, Susie Wason; cut glass vinegar bottle, Mr. and Mrs. M. A. Wason; silver sugar shell, Mrs. Neilie Blake and family; silver bread tray, Nellie M. Sawyer; picture of Venice, Henry Howard and Edward Brown; valance handkerchief, Mrs. D. H. Brown, West Medford; one dozen napkins and three towels, R. G. L. Tilton, Manchester; table cloth and napkins, Mr. and Mrs. W. H. Hill; Battenburg tile, Mrs. J. W. Prescott; cream ladle, Edna May Wason; sofa pillow, Mrs. Daniel W. Ellsworth, Haverhill; point lace handkerchief, Jessie Brackett, Colebrook; table cloth, Effie Brackett, Colebrook; silver ice spoon, Clarence Swain and Battie Chase; Royal Worcester vase, Dr. Gupstill and family; hand-painted China parlor ornaments, L. K. Morse and wife; bouquet, Mr. and Mrs. Geo. Shepard; bouquet, Mr. and Mrs. Will Hill; parlor clock, Mr. and Mrs. W. W. Dunbar; one dozen silver knives, Miss Edith Wright and Mr. Voudy; China cake plate, Mrs. Voudy; picture and frame, John B. Forbes; head rest, Mrs. Hattie Rowe; China chocolate pot, Mrs. Genther, Charlestown; half dozen silver teaspoons, W. F. Micoit; set of hand-made underclothes, Mrs. Frank Rowe, Exeter; damask towels, Mrs. Abram Smith.

OBSEQUIES.

The remains of Waldron Shapleigh of West Lebanon, Me., were taken to Eliot for burial to the family lot by Undertaker H. W. Nickerson.

The funeral of Miss Carrie A. Noyes of Newington was held at the home this afternoon, the pastor of the Newington church officiating.

The Herald has all the latest news.

## FIEND'S WORK

### Waldron Woman Was Horribly Mutilated.

### New Clews Secured by the Authorities Today Are Very Encouraging.

#### Funeral of the Victim Today--Deputy Sheriff Spencer of Berwick Here--Later Details of the Tragedy.

Charles McCloud, who was found dead in a place where the body was found, by the time the woman got there. Both distances could have been reasonably made by the two persons walking together.

Later than the time the two should have met, that the screams were heard by several persons, as previously reported. This makes the story plausible, though it is still far from being responsible for the cruel death of E. Waldron on Tuesday night.

For four hours this forenoon before the coroner's jury, and the members of the jury and the coroner absolutely refuse to give out any information, enough has been learned by the newspaper men to make them believe that McCloud will be held to answer for the crime under an indictment.

The case against McCloud, as far as it can be connected, is this:

He was in Portsmouth on Tuesday night, coming up from Kittery Point on the 6:30 car from Hutching's corner. He was drinking in this city before he returned. He purchased the bottle of liquor, which empty bottle was found beside Sarah Waldron's dead body, according to what has been learned. He went over to Kittery on the ferryboat at the same time, and took the same car from Badger's Island. The woman got off the car at the first fare limit, as already told. McCloud got off at Hutching's corner, two miles further down the line, when, to have gotten home the quicker, he should have continued a mile and a half beyond the corner, and left the car at the bridge between Cutt's Island and the mainland.

The fact that he told the conductor of the car he rode on, Willard Emery, that "I am going to wait for Sadie," has been established. The conductor noticed that McCloud had been drinking when he made the statement. The conductor thought nothing of it at the time, for it has been a frequent occurrence in past years for McCloud to get drunk.

A man living near the home of McCloud is alleged to have made the statement that he saw a person at about three o'clock going toward McCloud's home. The person answered the description of the man to whom suspicion has been directed. His collar was turned up and the slouch hat was pulled over the eyes. He walked with a kangeroo gait, for which McCloud is easily distinguished from other persons.

In regard to the theory under such conditions, it is perhaps a little less than a mile from where the body of the murdered woman was found from where she left the car at Old Ferry lane. It is perhaps a little more than a mile from Hutching's corner to where the body was found. McCloud, by hurrying back, could have easily reached the

#### BASE BALL.

The following was the result of the games played yesterday:

##### NATIONAL LEAGUE.

Boston 3, St. Louis 2; at Boston. Philadelphia 5, Chicago 4; at Philadelphia. New York 6, Pittsburgh 12, first game; New York 3, Pittsburgh 10, second game; at Pittsburgh.

Brooklyn 3, Cincinnati 7; at Brooklyn.

##### AMERICAN LEAGUE.

Milwaukee 6, Boston 4; at Milwaukee. Detroit 9, Philadelphia 1; at Detroit. Cleveland 5, Baltimore 4; at Cleveland.

Chicago 9, Washington 5; at Chicago.

##### EASTERN LEAGUE.

Toronto 4, Buffalo 3; at Toronto. Worcester 4, Providence 7; at Worcester.

Hartford 14, Brockton 13; at Hartford.

##### NICHOLSON'S LAUNCHING.

WASHINGTON, Sept. 4.—The navy department has been informed that the new torpedo boat Nicholson will be launched at Elizabethport, N. J., on September 19th.

##### KEMPF IN CHINA.

WASHINGTON, Sept. 4.—The navy department has been informed of the arrival of Rear Admiral Kempf on his flagship, Kentucky, at Samal Basin, China.

##### WEATHER INDICATIONS.

WASHINGTON, Sept. 4.—Forecast for New England: Fair Thursday, warmer in eastern Maine; Friday fair; light to fresh winds, mostly southwest.

##### ORDERED TO RETURN.

CONSTANTINOPLE Sept. 4.—Munir Bey, the Turkish ambassador to France, has been ordered to return to Constantinople.

##### NAVAL ORDERS.

These naval orders have been issued: Commander C. H. Arnold, to New York yard.

Lieuts. R. H. Flashner, C. Wells, E. L. Bisset, L. M. Nulton and H. O. Stickney, from the Solace to home and worked all day Tuesday.

McCloud was the only witness before the coroner's jury this forenoon. County Attorney Mathes kept up a fire of questions every minute. Every question was taken down by a stenographer, and typewritten. County Attorney Mathes did not say what McCloud admitted at the inquest. At twelve o'clock the inquest was adjourned until two o'clock this afternoon. McCloud was not allowed to go out of the room or to converse with anyone. After the jurors had filed out of the Golden Cross hall, over the Kittery Point postoffice, where the inquest is being held, McCloud remained in the room, and Mr. Mathes continued to pour his questions into the former's ear. It was said that a confession was expected before night.

At the conclusion of the morning session of the inquest, the county attorney directed that Deputy Sheriff Spencer and Officer Hurley go to McCloud home and summon Mrs. McCloud, who was put on the stand first this afternoon, for the purpose of telling about her husband's movements on Tuesday night, as far as she knew. She will also be made to tell about the condition of her husband when he came home, and about his clothing.

McCloud is known in this city and Kittery as "Bush" McCloud. He has been in trouble before, and was arrested several years ago and charged with an attempt to commit suicide. McCloud stood against the door for fifteen minutes, trembling all over, part of his body and apparently unable to speak. The two visitors would not be admitted.

The officers did not go into the house. McCloud stood against the door for fifteen minutes, trembling all over, part of his body and apparently unable to speak. The two visitors would not be admitted.

The U. S. S. Eagle will soon be ready for sea and will be the first of the three vessels, Vixen, Yankton and Eagle, to sail for Cuban waters.

STATE OF OHIO, CITY OF TOLEDO, Lucas County.

FRANCIS J. CHENEY makes oath that he is the senior partner of the firm of F. J. CHENEY & CO., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.

##### FRANCIS J. CHENEY.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886.

## EXCITING RACE

Columbia Again Wins From The Constitution.

Led By Only Seventeen Seconds, Corrected Time, However.

New Defender's Balloon Jib Was Torn Away Near The Finish.

NEWPORT, Sept. 4.—In a trial race between the Columbia and the Constitution this afternoon, sailed in a fine twelve knot breeze, fifteen miles to windward and leeward, the Columbia won by seventeen seconds, corrected time. A mile from the finish, the Constitution's balloon jib was torn in half, but the Columbia immediately afterward took in her own balloon jib. The race was very exciting from start to finish and opens anew the question of superiority.

##### TRAIN ROBBERS AT LARGE.

TEXARKANA, Ark., Sept. 4.—The six men who held up the Cotton Belt passenger train last night are still at large. They evidently rowed down a stream, thus obliterating their trail. At noon today the officers returned and reported

that they had been unable to find a clue. Tonight the posse came back, having called the bloodhounds from the trail. It has been discovered that the robbers secured one bag of gold which required the combined efforts of two men to take it from the express car to the engine. The through safe was dynamited. While the dogs were trailing the robbers, one of them, the other two boys. The leader's capture is hourly expected. The amount of booty as first estimated was too small. It will reach nearly \$500,000.

##### A BOARD APPOINTED.

WASHINGTON, Sept. 4.—General Chaffey has appointed a board of officers to take under consideration the recommendation of brevets and medals of honor covering the period of operations in the Philippines, and to make such recommendation as may seem to the board merited. The board consists of Major Gen. Lloyd Wheaton, Brig. Gen. James P. Wade and Frederick Funston. Capt. Julius R. Lindsay, Fifteenth cavalry, is the recorder of the board.

##### THE HARTFORD RACES.

HARTFORD, Sept. 4.—There were four races on the card at the grand meeting at Charter Oak park this afternoon. The favorites won each of them, in straight heats. The 2:00 pace, \$3000, was won by Shadow Chimes,—best time 2:06 3/4. In the free for all pace, \$2000, Prince Alert won,—best time 2:04 1/4. Bowell took the trot for three year olds, \$5000,—best time 2:16 1/4.

##### SLAVE TRADERS DEFEATED.

BRUSSELS, Sept. 4.—Advices from Katanga, Central Africa, report a pitched battle between twenty-five troops of the Congo Free State and two hundred slave traders, well armed, in which the slave traders were defeated and 150 rifles and an immense amount of merchandise were captured.

##### BY A LANDSLIDE.

CLEVELAND, Sept. 4.—Three men were killed and three seriously injured by a landslide today at the new Lake Shore bridge, at the boulevard entrance to Gordon park. Several hundred tons of earth came down from the bank, burying a force of laborers who were at work on the bridge.

##### A BAG SPILL.

NEW YORK, Sept. 1.—A bad spill occurred in the second lap of the fifteen mile motor paced race at Madison Square garden tonight. One of the machines collapsed and Johnnie Nelson was seriously hurt. Michael was not injured at all.

## A CERTAIN ARCHBISHOP.

The Unconscious Cruelty He Practiced When a Mere Child.

Well do I remember a certain archbishop, now dead, describing the unconscious cruelty he practiced when a mere child under the impression that he was really exercising virtue, apparently on the principle of doing to others not exactly "as he would have others do to him," but "as others did to him." His father, it seems, was a great disciplinarian. Among other useful lessons he was careful to teach his little son when at table to wait patiently till his effects were served and on no account to clamor for his food; it was, he reminded him, so vulgar and a mark of ill breeding. If "young hopeful" sometimes forgot the precepts of mature wisdom, if he thoughtlessly thrust out his plate for more before the rest of the company were done, his lapse of memory was generally assisted by a sharp reprimand, and instead of the savory ragout or juicy tisay cake upon which he had so greedily set his heart he was presented with a piece of dry bread and told to eat that.

In this way the lesson sank deeper. But the little uechin was evidently of opinion that others besides himself should profit by it, so he applied it in his own childish way to his friends the birds and the beasts. On visiting the nest of thrush or blackbird in the early spring his indignation was aroused beyond words by the quite too scandalously greedy behavior of the noisy young brood. Each time he approached four or five bright yellow throats were stretched to their uttermost, and such a gobble, gobble, filled the air that he felt he must really make an example of them and punish such intolerable greediness.

With his own personal experience to suggest the most appropriate of methods he deliberately picked up a number of pebbles from the gravel pathway and calmly proceeded to feed the impulsive fledglings with morsels of sandstone and grit. So long as the young birds continued to open their mouths so long did he continue to drop down pebbles, feeling all the time, he assured me, quite satisfied that he was simply handing on to them the lesson that his parents had instilled into him at home.

When a week or more had elapsed and chance led once again to the same spot the silence of death lay around. In place of four or five vociferous fledglings struggling in the nest, with open mouths and protruding necks, there were but four or five small flabby bags of undigested stones.

Then? Well, then he wept. Taboo! Yes, for not till then did he realize the full import of his act. In spite of his cruelty he was surely not really a cruel child?—John S. Vaughan in London Spectator.

### Made Him Hear.

A certain Market street merchant has his telephone near the front door. Not long ago the bell rang, and the merchant stepped to the phone and took down the transmitter.

Just at that moment a farmer came into the place and inquired:

"Want ter buy any pigs?" The merchant, intent upon getting the message, said to the phone, "I can't hear you," and gazed abstractedly at the countryman.

Raising his voice, the stranger shouted, "Want ter buy any pigs?" Still intent upon the man at the other end of the wire, the merchant said petulantly, "Oh, I can't hear a word you say!"

The man from north Georgia inflated his chest and lifted up his voice, fairly raising the roof, while everybody within a block thought the riot alarm had been rung. "Do you want ter buy any a-l-g-s?" he shouted.

"No; confound you, no!" shouted the merchant, dropping the telephone and clapping his hands to his outraged ears.

"You bet that raised him," remarked the egg man to his partner as he walked out and climbed into his wagon. "I never seed a deaf man yet what I couldn't hear when I put on all my steam!"—Chattanooga News.

### Bird Lands Mammmed.

The lovely Hawaiian spring was touching all things in the fairy Bird Lands. Oh why are they called Bird Lands? If nature sat down deliberately on the eighth day of creation and said: "Now work is done, let's play. Let's make a place that shall combine everything that is finished and wonderful, and beautiful—a paradise for man and bird and beast." It was surely then that she made these wild, fantastic hills, teeming with life, radiant with gayest flowers, variegated with sylvan groves, bright with purple sweeps and brimming lakes and streams. In foreground, edging and distant hills that change at every step we find some proof that nature spandered here the riches that in other lands she used as sparingly as gold; with colored sky above and colorful land below and the distance blocked by sculptured buttes that are built of precious stones and ores and tinged as by a lasting and un-speakable sunset. And yet for all this ten times gorgeous wonderland enchanted, blind man has found no better name than one which says "the road to it is hard"—E. Seton Thompson in *Sherburne*.

### Koreans at Prayer.

A returned sojourner in Korea tells me that he asked a native priest, "Tell me why you people knock down before a stone or a pile of wood or any inanimate object and pray to it? Why not pray to God as Christians do?"

"I will explain," said the devout idolater. "Christians close their eyes and look up without seeing anything as they pray. The Koreans do not pray to the piece of stone or wood, as you imagine, but to the same good God, and select the inanimate object merely as an emblem. Instead of seeing nothing they gaze upon God's handiwork, for God made the stone."

## FILIPINOS UNDER ARMS

### MacArthur Says They Are Less Than a Thousand.

### EVERYTHING GOING SMOOTHLY.

Former Governor General of Philippines Believes Civil Government by Natives Will Be Possible in Time. Better Element Progressive.

New York, Sept. 4.—Major General Arthur MacArthur, who recently returned from the Philippines, came to New York yesterday from Washington to pay his respects to Secretary of War Elihu Root previous to his departure for his home in Milwaukee.

"I had a very pleasant call on Mr. Root yesterday afternoon," said General MacArthur at the Waldorf-Astoria. "There was nothing in the nature of a consultation. I called merely to pay my respects. When I left Manila, my official connection with the Philippines ceased."

General MacArthur will remain here several days and then will go to Milwaukee, where elaborate preparations are being made to welcome him. The ceremonies will begin on Sept. 11 with a grand parade of the state troops and a banquet by the Merchants' association. There will be minor functions that will extend over several days.

### MacArthur to Succeed Merritt.

It is understood that General MacArthur will be placed on the waiting list for awhile to give him a rest and that after the retirement of General Merritt, now in command of the department of Colorado, he will be assigned to that command, with headquarters in Denver. He said it would be difficult to do him justice to discuss this matter, and he would neither deny nor confirm the report.

"Have you anything to say regarding the criticism of the methods employed by General Funston in capturing Aguinaldo?" General MacArthur was asked.

"Only this," he replied. "All credit for the achievement belongs to General Funston, but any criticism of the methods he employed should be directed to me, as General Funston merely was carrying out orders given by me. They are discussing this matter in Europe," he added, "much more than the people here appear to be doing."

Speaking of present conditions in the Philippines, General MacArthur said little remained to be done compared with what has already been accomplished.

"Everything is going smoothly there at present," he said, "thanks largely to the efficient co-operation of the war department under the direction of Secretary Root. There are less than 1,000 men under arms against us. They are divided in two groups, one in the southern part of the island of Luzon under Malvar and the other under Luban on the island of Samar. There is some disorder in the island of Bohol, but otherwise the islands are comparatively quiet."

### Must Retain Large Army.

How soon it would be expedient to reduce our army in the islands General MacArthur was not prepared to say, but for the present, at least, he says the military force there should not be allowed to fall below 10,000.

"It is not the number of men we have there, however, that has to do with overcoming the bands that yet remain under arms," he said. "The number we now have is as good as a million would be. The Filipinos have retorted to the fastnesses of the mountains, and it is only by cutting off their source of supplies, as we have done, that we finally can overcome them. It is difficult to describe these mountains. They are vastly different and more difficult to get about in than any we have in this country."

General MacArthur believes a civil government can be organized by the Filipinos in the course of time that will be satisfactory not only to them, but to the United States.

"There is a very evident desire on the part of all the better element to adopt English ways," he said. "They realize that American rule is there to stay."

As to the frauds in the commissary department, General MacArthur said there was no indication of any further trouble. The total loss to the government, he said, was not more than \$750, but he nevertheless deplored the fact that any officer should have yielded to temptation.

### Mr. Bryan Is Expanding.

Washington, Sept. 4.—William J. Bryan has bought *The National Watchman*, a newspaper published in this city and formerly known as *The Silver Knight Watchman*. It is expected that he will merge it in *The Commander*. *The National Watchman* is not printed here, and the subscription list is said to be its most valuable asset. There is no expectation that *The National Watchman* will continue to be published or that Mr. Bryan intends to have more than one newspaper. The consideration named in the bill of sale, which was placed on record, is \$5. The bill is signed by Edwin A. Newman, as president of *The National Watchman* company.

### Women as Bank Tellers.

Chicago, Sept. 4.—Bank tellers are beginning to look about for a new employment. This condition has been caused by their fair sisters, who have entered the field. One by one the various ceilings which it used to be thought one but a man could fill are being taken up by the women, and the new field to be invaded has always been considered the most conservative. The innovation has been started at the Royal Trust bank, where thirteen young women have assumed the duties of tellers.

## CUP YACHTS DID NOT RACE.

Much Concern Over New Boat's Poor Showing.

Newport, R. I., Sept. 4.—The cup racing wager of \$400,000 between Walter J. Kingsley, representing an English syndicate, and a number of Pittsburghers was closed at 4 o'clock yesterday afternoon. The money was placed in the hands of a prominent financier of this city who desires his name not to be made public. Mr. Kingsley turned over thirty-one \$1,000 Bank of England notes, and Mr. Mustin gave certified check for \$250,000. Mr. Mustin's compensation for his share in the arrangement of the bet is 5 per cent of \$250,000, which was paid to him as soon as the wager was consummated. The name of the stakeholder is the closely guarded secret in the bet.

**Turkey's Tidings.** Constantinople, Sept. 4.—Maurice Bey, Turkish ambassador to France, telegraphed to the porte on Saturday that he had strong hopes that a settlement of the Franco-Turkish difficulty would be reached which would preserve the dignity of both governments. M. Delcasse, French minister of foreign affairs, on the contrary, sent M. Bapst, counsellor of the French embassy, categorical instructions to take no steps to show that the relations between the two countries were modified.

**The Optimist at St. Vincent.** London, Sept. 4.—A cablegram to The Times from St. Vincent, Cape Verde Islands, announces that the royal yacht Diphir, with the Duke and Duchess of Cornwall and York on board, has arrived there. The voyage from the Cape was a pleasant one, and the heat was not oppressive. The two escorting cruisers sailed at St. Helena. The officers, on seeing the manner in which the Boer prisoners there were treated, came to the conclusion that the treatment was perhaps too good.

**BRIEF NEWS NOTES.** Commander Schroeder, governor of the island of Guam, has arrived at San Francisco.

**Four Killed by Lightning.** San Diego, Tex., Sept. 4.—A runner from the ranch of Cayetano Rios, about five miles west of this place, has reached here with the information that Luis Canfrolla, Pustacio Resendez, Isabel Lopez and Jesus Rios were killed by lightning and that Juan Trevino was fatally injured. The five men took refuge in a small house.

**President at a County Fair.** Canton, O., Sept. 4.—President and Mrs. McKinley attended the county fair yesterday afternoon. It was children's day, and hundreds of little ones from all over the county were present.

**Before the Bomb.** "Is Mickey in condition?" "He's as fine as silk. Al, Mickey's a great boy! He's got something up his sleeve that'll astonish all them other duffers."

"What is it, Mister Dolan?" "It's his ar-rrm."—Cleveland Plain Dealer.

**Dr. Samuel Porter Dead.** Farmington, Conn., Sept. 4.—At the family home in this town Dr. Samuel Porter, one of the most widely known deacons of the deaf and dumb in the country, died late last night at the age of ninety-one. Death resulted from a gradual decline of health due to advanced years. Dr. Porter graduated from Yale in the class of 1829 and for some months prior to his death had the distinction of being the oldest living graduate of the university but one in point of years and the oldest in point of matriculation. After graduation he became identified with the work of educating the deaf and dumb and was actively associated with the establishment of the National College For Deaf Mutes at Washington.

**General Ludlow's Funeral.** New York, Sept. 4.—The body of the late Brigadier General Ludlow, who died at Convent Station, N. J., on Friday last, was brought to this city over the Lackawanna railroad and conveyed to Trinity church, where the funeral service was read. The funeral procession proceeded on Broadway to Trinity church. At Hoboken the coffin was met by three companies of engineers from Fort Totten, three companies from Fort Hamilton and three companies from Fort Wadsworth, all under the command of Colonel John L. Rodgers of the United States artillery.

**Shamrock Has Successful Trial.** New York, Sept. 4.—The Shamrock II, yesterday afternoon had a very successful trial spin lasting three and a half hours. Sir Thomas Lipton, Mr. and Mrs. Jameson, George L. Watson, Commodore Hilliard and Mr. Ratsey boarded the yacht at 5 minutes to 2, and at exactly 2 o'clock the moorings were slipped, and the yacht sailed away on the starboard tack. At no time did the strength of the wind exceed five knots, and yet the yacht, with the wind ahead, traveled at fully a nine knot rate at times.

**Mr. Bryan Is Expanding.** Washington, Sept. 4.—William J. Bryan has bought *The National Watchman*, a newspaper published in this city and formerly known as *The Silver Knight Watchman*.

It is expected that he will merge it in *The Commander*. *The National Watchman* is not printed here, and the subscription list is said to be its most valuable asset. There is no expectation that *The National Watchman* will continue to be published or that Mr. Bryan intends to have more than one newspaper. The consideration named in the bill of sale, which was placed on record, is \$5. The bill is signed by Edwin A. Newman, as president of *The National Watchman* company.

THURSDAY, SEPTEMBER 5, 1901.

A drought sandwiched between the biggest wheat crop and an enormous peach crop is not so bad.

As we are not going to lose Minister Wu, it isn't necessary for the country to spend any time thinking how silence would seem.

After studying English institutions, Richard Croker has probably concluded that it must be very annoying for a man to have his powers restricted as those of King Edward are.

Thirty thousand young men emigrated from Finland last year to avoid military service in Russia. A drain like that will soon make a big hole in a country of 2,500,000 inhabitants.

Although the sultan's navy is queer, his soldiers are hard to handle. Each Turkish private thinks that if killed in battle he goes straight to paradise to be honored by hours.

What appears to be the most careful and intelligent inquiry of the conditions in the corn crop yet made has just been completed by Bradstreet's, and it shows a probable yield of at least 1,100,000,000 bushels. This would be a decline of about 700,000,000 bushels as compared with 1900, when the crop was 1,200,000,000 bushels, as estimated by the department of agriculture in Washington in its final figures. It would be a reduction of about 600,000,000 from the estimates made at the beginning of July, before the drought had come in destructive shape, and when rains were looked for at any day.

The organization of political parties in the Philippines is a good sign. It shows that the natives are not only accepting the situation, but that they are learning American ways. The Philippines have room for two big and intelligent parties, and the sooner these are formed the better it will be for the islands. The Americans are anxious to give the islanders all the home rule which they can stand with benefit to themselves and the United States. The parties which are being formed will help to disseminate American political ideas among the natives and enable the United States to grasp the drift of sentiment in the islands.

## PAN-AMERICAN TOURS.

There will be no time during the life of the exposition that will be more at tractive than the month of Sept. for visitors. The program of the various events, planned by the managers, includes something to appeal to all tastes.

Tour-two, arranged by the undersigned at an expense of \$30, including expenses, gives most for the money of any offered the public. The route is direct, rail Boston to Buffalo, including four lodgings and breakfasts, side trip to Niagara, etc., returning via Hudson River Line to New York, stop at that city a month, if desired, or at Albany. Tickets also include lodgings at Hotel Empire, New York, and state-rooms on the steamer returning.

One Thousand island trip, going via New York City and Hudson river to Buffalo and returning via the St. Lawrence rapids to Montreal and back through the Green mountains at an expense of only \$43.75, is away below any other figure in the market.

All particulars of the above will be sent on receipt of 2c. stamp by Geo. F. Tilton, City Pass. Agt., No. 314 Washington St., Boston. Telephone 2022 Main.

## OBITUARY.

Dr. Lewis G. Jones.

Dr. Lewis G. Jones, one of the most prominent professional men in Cambridge, Mass., died on Wednesday af-

ternoon, the 4th inst., at Greenacres, Eliot, where he has been passing the summer with his wife and little daughter. His age was fifty-seven years and seven months. Dr. Jones had been troubled with an intestinal complaint for some time. He was foremost in the management of the summer entertainments at Greenacres, and in his home city of Cambridge he was director of the Cambridge conferences. He will be greatly missed at Greenacres.

## MATRON AND MAID.

Lady Paunczofe said recently that she would rather live in Washington than anywhere else except London.

Fran Itta Von Itten, widow of a captain who fought at Waterloo, recently celebrated her one hundredth birthday at Hanover, Germany.

Mine Calve's favorites: Of animals, the cat; of flowers, the carnation; of perfumes, wild verbena; of seasons, the autumn; among roles, that of Ophelia.

Mrs. Harriet S. Bailey, who died the other day, was one of the pioneers of the modern city of Buffalo and its oldest citizen. She was 98 years old and went to Buffalo in 1833.

Miss Anne Tracy Morgan, daughter of J. P. Morgan, is a systematic business woman, keeping books of her expenses and income and overlooking her investments herself.

Helen Gladstone, daughter of the great Liberal, has become warden of the Woman's University Settlement in Southwark, London, and will soon leave Cambridge to live in that dreamy sun.

The Baroness Burdett-Coutts, famous for her wealth and philanthropy, was born just before Waterloo and is therefore past 80. Her husband, William Ashmead-Bartlett Burdett-Coutts, is about 50.

Mrs. James Brown Potter seems to be rivaled Patti in the chromatic changes of her coiffure. Mrs. Potter's hair is described as "the most brilliant shade of red you ever put your eyes on; it is positively scarlet."

The residence recently purchased by Mrs. Nellie Grant Sartoris, daughter of General Grant, from the daughter of Sir Hugh Allen is situated in the southwest part of Cobourg, Ont., on the most commanding site within its limits.

One of the most successful stained glass artists in the west is Miss Marie Hornell of Milwaukee. She has completed five in a set of six stained glass windows for St. Francis' chapel in that city. Miss Hornell first attracted attention at the World's fair in Chicago in 1893, where her window, "The Fairy Queen," was exhibited.

**A Man's Truth.**

"Two commercial travelers, one from Atherton and one from New York, were discussing the weather in their respective countries. The Englishman said that English weather had one great fault — 'A person may take a walk some day,' he said, 'arrived in a light summer suit and still feel quite warm. Next day he needs an overcoat.'

"That's nothing," said the American. "My two friends Johnson and Jones were once having an argument. There were eight or nine inches of snow on the ground. The argument got heated, and Johnson picked up a snowball and threw it at Jones from a distance of not more than five yards. During the transit of that snowball, believe me or not, as you like, the weather suddenly changed and became hot and sultry, and Jones, instead of being hit with a snowball, was scalded with hot water." — Tit-Bits.

## Bolled Rice.

Although plain boiled rice is the foundation of all rice cooking, few people understand how to obtain the best results. Properly cooked, each kernel should remain separate and unbroken and should swell to three times its original size. First wash the rice in two waters to remove the superfluous starch, allowing it to stand in the last water for four or five minutes. One-half cupful of rice will require two quarts of water and two teaspoonsfuls of salt. Bring the salted water to a boil and drop the rice into it gradually so as not to stop its boiling. Boil rapidly for 20 minutes without stirring. Then drain through a colander, mix with cold water (through the colander), shake it free from the water, return it to the saucepan and let it stand five minutes. This is the basis of all rice cooking.

## FOWLS AND THEIR FRUIT.

Soft soap is a good remedy for scaly legs.

There is no better disinfectant than burning sulphur.

Heats should not be kept so fat that they will not forge.

Never sell the best and never buy anything but the best.

Wash the dirt off the eggs before sending them to market.

Ducks require considerable water to drink. They should be watered whenever fed.

Well fed pullets will lay much earlier than those allowed to go on the roost hungry.

A little salt and sulphur in ducklings' food when they are about 8 weeks old will help them in feathering.

See that there is a plentiful supply of ground bone and crushed oyster shells in reach of the fowls, for without these the soft shelled eggs will soon appear, and then will begin the habit of egg eating by the hens.

All particulars of the above will be sent on receipt of 2c. stamp by Geo. F. Tilton, City Pass. Agt., No. 314 Washington St., Boston. Telephone 2022 Main.

Charles E. Walker,

Goverment St., Kittery, Me.

## FIEND'S WORK

[Continued from First Page.]

to this, and had some object in getting off the car at Old Ferry lane, other than because she did not have the money to pay her fare for the remainder of the distance.

Whether she had an appointment to meet McCloud, has not been established. It looks probable that she did. That McCloud was trying to conceal the fact of an engagement with the Waldron woman, by continuing on to Hutchings' corner, seems reasonable.

Deputy Sheriff Spencer and Officer Hurley are doing some very good work on the case, and the people of Kittery are loud in their praise of the efforts of the two men. Sheriff Foggs of Sanford will arrive in Kittery tonight and assist. The two officers mentioned have worked night and day, and the results thus far seem to justify the wisdom of their course.

The stick the murderer jabbed into the body of the woman has not been found, and the search for this instrument will be made until it has been located, if possible.

McCloud is a very dark skinned person, and in some respects resembles an Italian in appearance. He has black hair and a black moustache. He is the son of Almond McCloud of Kittery Point, the father being a good citizen and a skilled mason and builder. "Bush" McCloud has been married several years to a woman who came from what is known as the "Firetown" district in York.

The funeral of Sarah Waldron was held at the home of her parents, on Foye's lane, at eleven o'clock in the afternoon. The Rev. Victor Morse, pastor of the Free Baptist church of Kittery Point, conducted the service. The occasion was one of the saddest Kittery Point has known for a long time. The mother of the dead woman is almost in sane with grief. The two children of the woman are not old enough to realize the terrible death of their mother. No one but the family was present at the service. Interment was made in the family lot, beside the grave of a sister made but six weeks ago today. The funeral arrangements were under the direction of Mr. Oliver W. Ham of Portsmouth.

At the continuation of the inquest Wednesday, three witnesses were examined, the conductors of the cars on which the woman came and went from Portsmouth, and J. Chester Cutts, one of the men who first saw the body.

It was also learned from the father of the woman that her gold watch was missing and robbery as well as murder was committed.

The examination of the body by the physician showed that there were three distinct injuries either of which would have resulted in death. The blow delivered by a club on the head, back of the ear, the strangulation, and the mutilation of the person, which is too horrible to describe.

The inquest was adjourned to 8:30 o'clock, this morning, in Golden Cross hall.

County Attorney Mathews came to this city on Wednesday evening, 4th inst., and had a long talk, by the aid of an interpreter, with the Italians. What they had to say was gotten out of them with considerable difficulty.

Another arrest in the case was made on Wednesday evening. Officer Hurley came over from Kittery shortly after nine o'clock, having in custody an Italian named Tony Gerry, twenty-two years old, who was locked up on suspicion. He is quite a clean appearing man of Italy and talks good English.

Gerry is said to have been in the Waldron woman's company frequently. There is no direct evidence connecting him with the crime. When found at the Italian camp, Cottle's hill, he came along willingly enough. He has a scratch or cut on one cheek.

Well fed pullets will lay much earlier than those allowed to go on the roost hungry.

A little salt and sulphur in ducklings' food when they are about 8 weeks old will help them in feathering.

See that there is a plentiful supply of ground bone and crushed oyster shells in reach of the fowls, for without these the soft shelled eggs will soon appear, and then will begin the habit of egg eating by the hens.

All particulars of the above will be sent on receipt of 2c. stamp by Geo. F. Tilton, City Pass. Agt., No. 314 Washington St., Boston. Telephone 2022 Main.

## TESTING OCEAN CURRENTS.

How Russia and America Conduct Interesting Experiments.

One of the interesting scientific experiments of the time is that quietly going on year after year, under the joint direction of the Russian government and our own, for the exact determination of the direction and velocity of ocean currents.

All American and Russian warships and merchant vessels carry with them a supply of empty beer bottles, says the New York World. As they traverse the seas thousands of these bottles are "cast upon the waters," to be recovered "after many days." Each bottle carries a record telling when and where it began to drift. Whenever one is sighted by a Yankee or Russian ship, it is picked up and a record made of where and when it was found. Then it is corked up and again sent adrift, to be picked up again and again and similarly used until perhaps it has indicated the force and direction of the currents over many thousands of miles of sea.

The records of our hydrographic office show that many of these bottles have drifted from 5,000 to 8,000 miles at a speed varying from 2 to 35 miles a day. The accumulated reports of several years have already yielded valuable information. Bottles cast into the sea near the equator tend westward and usually bring up in the West Indies or on the coast of Mexico. Along our Atlantic coast and north of the fortieth parallel bottles generally drift to the northward and eastward and are picked up on the north coast of Ireland or even farther north. A fact not yet explained is that bottles thrown into the stretch of the Atlantic that lies between latitude 25 degrees to 40 degrees north and longitude 30 degrees to 60 degrees west, which is crossed by numerous steamship routes, are very rarely seen again. Only six out of many hundreds have been recovered since 1888.

**ELECTRICAL FISHING DRAWS.**

McCloud and Francis G. Hall, Jr., boys, who were graduated last year. The practical possibilities of the light were explained to us by the millionaire, and the electrical fishing boat, designed specifically for deep sea fishing, is now under way.

On each of the boats there will be four electric lights on cables 200 feet long. Each lamp will be lowered in a net which will automatically open. The weight of the fish will close it. Each boat will be equipped with a complete electric lighting plant, and wherever possible wood will be used to obtain sound. For night fishing the device consists of an upper chamber solenoid and other mechanism. The lower chamber is inclosed in a glass globe, which is hermetically sealed to the upper chamber, designed specifically for deep sea fishing.

The lamp is 22 inches over all and is encircled by a handle seven inches in diameter. The metal parts are of gun metal. The glass globes are designed to withstand a pressure of 100 pounds, insuring safety at a depth of 1,000 feet. The greatest depth to which any diver is known to have descended is 204 feet. The feeder cable is fed into the mechanism chamber through a rubber packed stuffing box, and when immersed the lamp is, of course, water tight.

## 7-A Chance for Electricians.

A Berlin tramway company offers prizes of \$750 and \$375, respectively, for the best speed indicators suitable for use on their cars. An additional royalty will be paid to the owner of the successful instrument.

## To Make Ozone by Electricity.

A patent has recently been taken out in Germany for the production of ozone by the electrification of the air by a process which reduces the heat generated and, therefore, the formation of oxides of nitrogen to a minimum. The apparatus to be preferred has its electrodes covered with a very large number of points and separated by glass plates. The great point appears to be to make the electric discharge as nearly invisible as possible.

## Here's a Pleasant Prospect.

This summer's excessive heat is explained by a Chicago scientist in a way calculated to give both chills and fever to that part of humanity which accepts his explanation. He asserts that the earth in its annual revolution about the sun is approaching nearer and nearer to that orb every summer and getting farther and farther away every winter. The ultimate result, he avers, will be that the inhabitants of this sphere will be alternately baked and frozen until no living being is left.

## Human Resistance.

People recovering from one of the other of the heat waves of summer may be shocked to learn that while the official thermometer reads 102 degrees it is quite 100° of the human system to tone down with 600 degrees of heat before there on the earth's surface does the heat begin to approach man's capacity for resistance, and in spite of the laws of physics the blacker the skin the more heat he can stand.

The discovery was made at the Oxygen hospital, London. The gas is used for the cure of quite a number of diseases.

A woman was undergoing the oxygen cure for skin disease, and one of her arms had for many days been placed in a light airtight box filled with the gas. It was soon noticed that on that part of the arm that was unaffected by the disease the growth of hair was much stimulated, and this naturally suggested oxygen as a cure for baldness.

The first experiment was made upon a woman who had completely lost her hair, and it was found that after a few weeks' treatment there was quite a strong growth.

**Absorbent to Clothing.**

A German absorbent for clothing is sweeping the world. It is made by mixing 12 parts by weight of resinous oil with 88 parts of resinous Portland cement, a few drops of turpentine oil being added. The greater density mass retains the dust of the atmosphere, preventing the particles from being scattered.

## MIRAGE SURPRISES.

### PUZZLING PICTURES IN THE DESERT COUNTRY OF ARIZONA.

Wonderful Illusions That Vanish From Sight Like a Shooting Star and Some Others That Linger Until the Going Down of the Sun.

As the mirage is so infrequent in the populous part of our country and as so little is said about it, it is probable that the majority of Americans know it only by name, though they may have read descriptions of the mirage of the Sahara desert or the Fata Morgana of Sicily and southern Italy. Occasionally it may be seen across Lake Ontario, and New York state may look upon a Canadian town pictured upon the sky. This happens but once in many years.

But the mirage of the southwest becomes a friend, a sort of traveling companion. As the traveler passes through Arizona on the train he sees the lakes coming and going all the time and wonders if it is not a mistake to call it a mirage. Occasionally it will be astounded to see wild animals come so near again, but when he sees some great animal larger than the elephant, he begins to ask questions and is likely to feel that he has been told that it is all a fancy picture. Our party was surprised to see a mirage of phantoms that we were told would be mistaken for animals.

We had left the Colorado river, and were traveling along the Colorado river when we beheld a city built out of marble, with cathedrals, palaces, temples, pillars capped with crosses, and Christian saints, with streets paved with marble, and a river winding its way through the city. We believed it a mirage, but thought it was built of marble because it was so plentiful here. It was a grand splendor, but a child of the sun, gave life and beauty to the sand hills, deserts, and, lo, when we look again the magic city, with its wonderful towers and pillars and river, has vanished like a shooting star.

Along the Colorado river the mirage is frequent. Sometimes the objects are reversed and appear to be upside down, sometimes vertical—that is, standing one above the other. The scientists say that these mirages are caused by the heating of the sand, the atmosphere being of much higher temperature near the surface, where it expands rapidly, but leaves the greater volume of air above dense; that the sun striking the air obliquely forms an angle of light because it passes uniformly through the dense air, but when reaching the diffused air it pierces more rapidly and inclines straight toward the earth instead of obliquely, with a tendency to turn back toward the denser atmosphere. This angle of light causes a reflection. The objects on the earth are shadowed in the lower strata and reflected from that upon the higher. And yet this was not a satisfactory explanation to us, for the mirage astonished and amazons us after the sun had gone.

One evening we were sitting on the steps of a ranch cabin when, looking toward the south, we saw a magnificent monastery. We were surprised that we had not seen it before. It was then growing dark, and we could see it until total darkness closed. In the morning it was gone. The next morning we were aroused before daylight in order that we might see the train at The Needles, about 80 miles south. We could see the cars plainly, as well as the men. The whole scene seemed but a few hundred yards away. This, we were told, may be observed almost any morning in the year.

The next surprise the mirage gave us was near the Pagano Indian reservation. One morning we were presented the picture of a lively city. The houses and the market were plain, and the inhabitants, wearing their sarapes and sombreros, were hurrying about, men on moustaches were going here and there and there was no mistaking the fact that it was a real city. We learned afterward that it was the town of Magdalena, Mexico, a hundred miles or more south.

But the most wonderful of all the scenes is that of the Jim Jim valley, in the San Bernardino mountains, over the Arizona line in southern California. From Yuma to the mountains we passed many scenes, the most interesting being the mud "volcanoes." The mud is thrown up from many openings, some springs spouting several feet in height. There is a continual making and destruction of mud pies. These so called volcanoes are sometimes below sea level and generally quite cold, though a few are boiling hot. Both are accompanied by a rumbling noise. One sees the skeletons of many birds that in their search of water have perished by the fumes of the "volcanoes." We saw the remains of mocking birds, golden eagles and the Mexican snowbird.

When we entered the Jim Jim valley through Dead Man's pass, the sun was shining brilliantly. We had not gone far when we witnessed strange things. The walls of the cliffs are frightfully seared and the peaks twisted into tortured forms. Not a living creature of any kind inhabits the valley, which is 20 miles or so in length and probably half as wide. So far as we could tell, when in our right senses, not a plant or living thing of any nature inhabited this valley. Yet we saw many lakes and rivers and flocks and birds and water fowl which vanished as we proceeded and formed again beyond. We saw strange beasts coming toward us in all directions, which made us restless and the women of our party almost hysterical.

Beyond we saw Indians in their canoes and thought to reach them, but they, too, vanished. In their stead we saw a mountain rise in a lake of silver. Great birds of different hues seemed to hover over the lakes; beautiful trees, with fantastic forms, hung over the water. The mountain seemed to move, and as it moved its summit was crowned by a great ball of blue fire, which was surrounded by a halo of light. We were astonished to see the mountain nearing us. Of course we knew it was an illusion, but when the mountain took appeared to break off and to be falling upon us our nerves were quite unstrung. The women were almost prostrated. We knew that a storm was brewing, so we hastened back. The storm broke before we reached Dead Man's pass, the lightning flashing on all sides of us, forming in crosses, stars, halos and other fantastic forms. The thunder crashed from wall to wall and seemed to tear the mountains and the very atmosphere.

Upon leaving the valley a feeling of relief came to us, and we all agreed that if it had not been named we certainly would call it the "Jim Jim valley."—Detroit Free Press.

## HIDDEN USES OF TREES.

They Are Liberating Oxygen and Moisture Day and Night.

Utilitarians consider the trunk the important part of the tree. The trunk is a wise makeshift of nature which towers aloft and tries to lift the vital organs of the tree—the leaves—out of harm's way and into purer air and brighter sunshine. Beneath the ground the strong roots and rootlets have hundreds of eager, thirsty mouths which take nourishment from the earth. Water and mineral matter are carried upward by the process of capillary attraction to the leaves in the crown and the branches for digestion and assimilation. A leafless tree stands little chance of living. Trees denuded of their leaves by caterpillars and other mischievous things are deprived of their stomachs and lungs at once.

Every leaf on a tree is ceaselessly industrious day and night. Examine the linden leaf, or, in fact, any leaf will do—the truth applies to all—and notice how its surface is spread to catch the sunshine. The underside of the leaf has a different appearance. The tissue is tender and a network of breathing pores. A section placed under the objective of the microscope reveals tiny cells filled with greenish liquid called chlorophyl, which plays an important part in the domestic economy of the tree. When undigested food from the ground has been carried to the leaves, the chlorophyl seizes it, and under the influence of sunlight changes it to nourishment. The chlorophyl also breaks up the carbon dioxide with which it comes into contact and, liberating the oxygen, sends it out into the atmosphere.

These messages were received by the Christian Herald of this city from the Rev. Arthur T. Smith of Tientsin, chairman of the famine relief committee. The first message was as follows:

"Terrible Yangtse floods. Dr. Richard and others approve Shanghai committee of Chinese and foreigners, embracing consuls, merchants, missionaries, distribute relief. If funds not all required in Shanghai, then transfer to Yangtse."

Several hours later a second cable message was received, as follows:

"Dr. Duncan wires one-third population dead Shanghai. Forming Yangtse relief committee."

Dr. Klopsch, who is the editor of The Christian Herald, at once cabled to Chairman Smith endorsing the decision of the committee to apply the unexpected balance of the famine fund in behalf of the Shanghai flood sufferers. The committee has power to extend its relief operations and will probably begin work immediately.

### Floods of Frequent Occurrence.

Floods on the Yangtsekiang are of periodical occurrence, but the present one seems to have been more destructive than usual. The river is one of the largest in China and has a very tortuous course along a wide, low lying valley. It joins the sea by an estuary thirty miles across.

Shanghai is situated at the mouth of the Wongpoo river, twelve miles above the mouth of the Woosung, in the estuary of the Yangtsekiang. It stands on a level and highly cultivated plain and is in no danger from floods. There appears to be an apprehension by the reading of the second Chefoo dispatch, making it appear that one-third of the population of Shanghai are dead.

The period should evidently be placed after the word "dead," and the dispatch should read: "Dr. Duncan wires one-third population dead. Shanghai forming Yangtse relief committee."

Early in July a cable dispatch to the London Standard reported the drowning of over 4,000 persons by a typhoon in the Yangtse valley.

### CULINARY CAPERS.

A few slices of orange added to a cream of tomato soup just before serving will, it is said, improve its flavor.

If cabbage and cauliflower are their freshness, a tiny pinch of sugar will revive them.

When any recipe includes the juice of one lemon, the quantity used should be four tea-spoonfuls, as both the skin and the juice of lemons vary.

When making tea, if the kettle has been boiled, pour a cup of cold water and let it boil up again before making, and you will find the tea will be as sweet again.

In cooking macaroni or spaghetti it is found an improvement to melt the butter and cheese together and add them to the white sauce, instead of sprinkling them, as usual, between layers of the macaroni.

Some time when you want an apple pie, apples are out of season, try plantain as a substitute. Cut in pieces and use with a few raisins. You will be glad you tried it if you serve whipped cream with it.

If you want to keep fish, never put one on top of another. Wrap each fish separately in a clean cloth wrung out of cold water in which some salt has been dissolved, lay them on dish and keep them in the coolest place available.

### The Beauty Spot Patch.

The custom of wearing black patches to make the skin seem fairer came from the habit of applying in the sixteenth century pieces of black velvet or other dark stuff to the temples for the headache. A fashionable coquette discovered that these were becoming and brought them into use in France, whence they spread to the clergy and the church, though use was not general among men. They were called mouches and were made round, square, oval and in the shape of stars, hearts, crescents and animals of all sorts, so that a lady's face sometimes had the appearance of a menagerie.

### Railway Improvement.

There was a time, which some of us remember, when a man before taking a long ride on a train would make his will and say goodby to his family with the most unpleasant anticipations. In those early days trains did not run fast, but when they ran off the track there were apt to be most uninteresting corpses. To-day when we read of a train going 60 miles an hour breaking in two, hurling part of itself down a steep embankment with the result that only a few are injured and these slightly, we feel that there has been progress. In fact, one is safer on a train than almost anywhere else.—Philadelphia Inquirer.

### Sarcasm.

"Do you know, Miss Frisbie," said the large headed young author, "my most brilliant thoughts come to me in my sleep?"

"It's a great pity that you are troubled with insomnia," added the pert young lady.—Detroit Free Press.

### Defined.

Teacher—What little boy can tell me what is a "phonetic?"

Tommy—I know. My sister's one.

Teacher—Your sister?

Tommy—Yes; she plays the pianist all the time.—Philadelphia Press.

### Fast Time.

Parson—Yes, on one occasion I married four couples in a quarter of an hour. Quick work, wasn't it?

Nautical Young Lady—Yes, rather; 16 knots an hour.—Punch.

## THOUSANDS DROWNED.

### Terrible Floods in the Yangtse Valley, China.

### THIRD OF POPULATION DEAD.

Chairman of Famine Relief Committee Starts Movement For Aid of the Sufferers—He Has an Unexpected Balance on Hand.

New York, Sept. 4.—Messages received in this city yesterday told of a great flood disaster in Shanghai, China, in which one-third of the population of the city, fully 125,000 persons, have been wiped out by the surging waters of the Yangtse, the largest river in China.

The Amalgamated officials, however,

declare that everything is proceeding satisfactorily and say that much of the supposed advantage of the manufacturers is a bluff and cannot be made good.

As an instance they cite the Lindsay & McClellan mills, the defectors from the strikers' ranks of seventy-five machinists and pipe cutters at the Continental Tube works and fifty at the Pennsylvania Tube works, the importation of twelve men to the Monessen steel hoop mill and the installation of three mills on the night shift at the Clark plant all point to an early resumption all along the line as viewed by the steel officials.

The Amalgamated officials, however,

declare that everything is proceeding satisfactorily and say that much of the supposed advantage of the manufacturers is a bluff and cannot be made good.

As an instance they cite the Lindsay & McClellan plant, where the company claims to have as many men at work as can be accommodated and to be turning out merchantable product.

Affairs at McKeesport are quiet and to all appearances unchanged. The strikers point to the fact that the miners who were persuaded Monday to leave the National Tube works did not go in yesterday as a victory for them.

The Domtar plant is still being discussed, and the attempt to start is now

scheduled for the latter part of the week.

The managers say that the only

thing holding them back is inadequate protection for the workers, a full complement being ready to go in.

Mayor Black is still withholding his final answer to the request for police protection.

It was reported yesterday afternoon that the strikers at Lawrence intend to make another effort to close that plant by getting the open heart men out, but nothing definite on the subject can be learned.

### No Doctors in Labrador.

St. John's, N. F., Sept. 4.—Dr. Greenfield, superintendent of the mission to deep sea fishermen, now operating in Labrador, publishes a harrowing article exposing the medical deficiencies of that portion of Labrador which is under Canadian jurisdiction. He asserts that at Bradore he found an invalid girl nine years of age tied in dog harness when her relatives were not able to watch her. He found people dying of cancer, dropsy and scurvy who had never seen a doctor. He found no hospital near, no regular steam service to Gaspe or Quebec and no means by which the people could procure medical or surgical treatment. He urges the Dominion government to take prompt steps to remedy these conditions.

### Revolutionary Monument Dedicated.

Wilmington, Del., Sept. 4.—At Coopers Bridge yesterday the monument marking the battlefield where it is claimed the stars and stripes were first unfurled in battle was unveiled. The day was the anniversary of the engagement in 1777 between the troops of General Washington and General Howe, which was commemorated in the exercises.

Craig Justice Lure, president of the Historical Society of Delaware, presided. The monument was presented to the state by J. Wilkins Cooch and was received by Governor John H. Hubbard.

Addresses were made by Walter S. Logan of New York, president general of the National Society of Sons of the American Revolution; General James I. Wilson, U.

# TRUSSES

Having all the latest improvements in TRUSSES, combined with the "KNOW HOW," enables us to GUARANTEE SATISFACTION. Try us! If we fail to fit you, it costs you nothing.

CEMETERY LOTS CARED FOR

AND TURFING DONE

W. H. increased facilities the subscriber is now prepared to care for and keep in order such lots around the cemeteries in the city as may be intrusted to his care. He will also give careful attention to the turfing and preparing of lawns around the cemeteries and headstones and the removal of bushes. In addition to work at the cemeteries he will do turfing and grading in the city as about noted.

Concrete lots for sale, also Loan and Turf.

Orders left at his residence, corner of Birchwood Avenue and South street, or by mail, or left with Oliver W. Blanchard, 101 Market Street, Peter G. Market street, will receive prompt attention.

M. H. GRIFFIN.

## THE HERALD.

THURSDAY, SEPTEMBER 5, 1901.

### CITY BRIEFS

This is Portsmouth day at Hampton Beach.

Who repairs your shoes? John Mott, 24 Congress St.

The U. S. S. Marietta should arrive here in about ten days.

The weather men seem to be on good terms with all the fairs.

The football player has had his last hair cut for three months.

J. E. Hoxie has a force of painters at work on Music hall stage.

The silly French heels are coming in vogue again among the women.

The next attraction at Music hall will be Henrietta Crossman in Mistress Nell.

The change in time on the local street railway will take place in about three weeks.

A few weeks more and the trees will commence adorning themselves in gay colors.

The steamer City of Fitchburg continues to carry a large number of passengers daily.

According to the almanac, today (Thursday) winds up the season of dog days, which began on July 25th.

"Now good digestion waits on appetite, and health on both."

If it doesn't, try Burdock Blood Bitters.

The need of a resident coroner in Kittery was never more convincingly demonstrated than on Wednesday, the 4th inst.

Diphtheria, sore throat, croup. Instant relief, permanent cure. Dr. Thomas' Electric Oil. At any drug store.

Rev. Edward Everett Hale, D. D., will preach at Union chapel, Little Boar's Head, on Sunday, September 8, at 11 o'clock.

Judge William G. Ewing of Chicago is to lecture on Christian Science at Philbrick hall this (Thursday) evening at 7:30 o'clock.

Terrible plagues, those itching, pesterous diseases of the skin. Put an end to misery. Donn's Ointment cures. At any drug store.

Trains going west have for the past few days been crowded with summer visitors who have passed the warm months down east.

At least one barber in town, W. H. Watson of Laud street, will follow the example of the grocers and close his shop today (Portsmouth day).

The first of October will see a rush of sportsmen through here for Maine, to enjoy the fall campaign after the big game, which will continue until the snow flies.

At Christ church this evening, there will be a devotional meeting for communicants at 7:30 o'clock, followed immediately by a social gathering in the guild room.

No need to fear sudden attacks of cholera infantum, dysentery, diarrhoea, summer complaint of any sort if you have Dr. Fowler's Extract of Wild Strawberry in the medicine chest.

Five drunks were locked up in the police station on Wednesday night. Four of them are guzzlers of sour beer and haunters of freight cars, and they'll come up before the judge. The other fellow may not.

### POLICE COURT.

At the session of police court on Wednesday morning, the 4th inst., seven of the world's human riff raff were up for judicial treatment, and they certainly got it.

Accept no substitute for Hood's.

## Worms?

cause disease, and sometimes death, in children, before their presence is suspected. Give them a few doses of

**TRUE'S PIN WORM EXIR.**

Iron, Zinc, Sulphur, Salicylic acid, Aromatic vegetable oil, etc. at druggists.

Dr. J. F. TRUE & CO., Auburn, Me.

### STRATHAM.

Mr. and Mrs. Peter Cote have been visiting in Woonsocket, R. I.

James Nixon and Mark Piper have entered New Hampshire college.

Mr. Winslow Chase and family are visiting Mrs. William D. Littlefield.

Miss Blanchard Wiggin is home on a short vacation.

Fred Foss of Boston has been spending a few days at Mr. G. A. Wiggin's.

Mrs. D. C. Littlefield is visiting in Beverly and Westboro, Mass.

Mrs. Martha Copeland of North Attleboro, Mass., has been the guest of Mrs. E. M. C. Lane.

Our genial postmaster, Edgar N. Smith is enlarging his residence by the addition of four more rooms.

A. C. Lane and family spent Sunday at Hampton Beach; also Mr. Charles J. Brewster and Fred W. Sovrance with their families, and Lottie G. Smart.

Miss Helen P. Gowen is teaching at Belmont, N. H.; Miss Alice G. Smart at Holly, Mass., and Miss Anna E. Thompson at Northfield, Mass.

Miss Flossie Gregg of Beverly has been the guest of Miss Mary Dean.

The schools have all commenced in town with but the change of teachers, Miss Lois Beck of Greenland having charge of division No. 2.

Mrs. Berry of Beverly, formerly Miss Ella Dean, has been visiting her parents, Mr. and Mrs. George Dean.

Miss Gertrude P. Cole of Peabody, Mass., who has been visiting Mrs. S. M. Pearson, returned to her home on Friday.

Several from this town attended the meeting of the Ponom Grange on Wednesday, held at Brentwood.

### FAVORED THE CROPS.

The warm, moist weather has been favorable for the growth of all crops and foliage continues nearly as green and luxuriant as it was in June. From northern sections of New England alone come reports that the ground is dry and rain is badly needed.

This is the corn season, and all the agricultural correspondents report phenomenal growth. The apple crop will be light, nowhere too large for home consumption. Potatoes have improved somewhat within a week, but the crop will not be heavy. Fruits generally are doing fairly well.

### ORGANIZED IN KITTERY.

Standard Light company, organized at Kittery for the purpose of carrying on a business of manufacturing, selling and dealing in apparatus of various kinds for lighting, heating and other purposes, with \$500,000 capital stock, of which nothing is paid in. The officers are: President, Forest A. Ray, Boston; treasurer, Arthur H. Galligher, Boston. Certificate approved Sept. 23, 1901.

### LOSS OF APPETITE.

Is commonly gradual; one dish after another is set aside till few remain. These are not eaten with much relish, and are often so light as not to afford much nourishment.

Loss of appetite is one of the first indications that the system is running down, and there is nothing else so good for it as Hood Sarsaparilla—the best of all tonics.

Accept no substitute for Hood's.

### ADLINGTON—LUTTÉ.

Harry Adlington and Miss Eunice Lutts, a highly respected Kittery couple, were married at the home of the bride in Kittery on Wednesday evening, the 4th inst.

### HARBOR FRONT NEWS.

Arrived, Sept. 4.—Steamer Williamsburg, Boston for Philadelphia, light.

Arrived, Sept. 5.—Tug Peter B. Bradley, Boston; tug Piscataqua, Boston, towing barge Berwick, light, for Eliot.

Sailed, Sept. 5.—Schooners Elm City, east; William C. Tanner, coal port; Peter B. Bradley, Boston; schooners Helen L. Martin, Boston, Ada J. Campbell, east; tug Piscataqua, barge Dover, Boston.

### NOTES OF THE DAY.

In lower harbor, Sept. 5.—Steam yacht Columbia; steam yacht Dauphine.

Sailed, Sept. 4.—Schooners Eliza St. George; Carrie C. Miles, Carvers Harbor; steamer John Wise, Stonington, towing barge Margery.

### DECREASE IN TAX RATE.

The state board of equalization, which met in Concord a day or two ago, reports that the average state rate of taxation this year is \$1.69; that it is \$16.90 on \$1000. Last year the rate was \$1.70.

## WOMEN AT THE SHOALS

### New Hampshire Federation of Women's Clubs Field Day.

### History of the Shoals by Mrs. Mary Wood of Portsmouth.

### Big Attendance from All Parts of the State and Intense Interest.

ISLES OF SHOALS, Sept. 5.—That the Woman's club monument is in New Hampshire to stay is amply demonstrated by the large number of officers and delegates assembled at the Oceanic, Star Island, for the annual field meeting, now in session.

From the north, south and west the women of New Hampshire, who are interested in the advancement of the practical study of art, literature, education, science and philanthropy, have come to this, the most easterly point in New Hampshire to discuss the best ways and means by which these various interests may be advanced, and to enjoy a nearer and better acquaintance with each other.

The Field meeting of the Federation is its play day since all the rest of the year is devoted to the furtherance of the plans laid at the regular annual meeting which is held in May of each year.

The lecturer of last evening was the Rev. William Bryon Forbush of Boston, whose work among boys and whose sympathy and insight into the boy nature have already placed him among the foremost platform lecturers of New England.

A short, but most delightful history of the Shoals was given today by Mrs. Mary Wood, president of the Grafton club of Portsmouth.

Music is furnished by the Portsmouth members. The vocal selections were rendered by Mrs. Frye in a most pleasant manner, and the instrumental pieces by Miss Florence Marshall who is of very high order.

At the meeting this morning much time was given to a discussion on shipwrecks conducted by Miss Susan Mathes of the state art committee.

Other questions to be considered are doubtless the propriety of the New Hampshire federation joining the national clubs in introducing elementary courses of study in the public schools throughout the state.

Among other questions brought up may be the color line, which is a great question agitating the colored population of M. D. Women's club, which will absorb attention at the meeting to be held at Los Angeles in spring.

ISLES OF SHOALS, Sept. 5.—The historical address by Mrs. Mary Wood of Portsmouth was delightful and in introducing many facts, framed in language appealing attention and interest, was well received.

If I could bring to mind this evening a small part of the characteristic envelope of the Shoals, which looks like a mantle over their rocky shores, which hovers like a benediction over their barren rocks—if I repeated it, it would be lost.

Enclosure may a poor Distressed Seaman & Fisherman in distress of weather.

One must live in some place similar to the Shoals to fully appreciate the last line of this good man's epitaph, "In distress of weather," and one of the most touching stories which come to us in this man's history deals with this phase of experience and may be of interest to the lovers of folk lore.

The Gosport records of 1813 bear this entry: "Ship Sagunto stranded on Scituate Isle, Jan. 14, 1813." On that stormy January night, so runs the story—this good, goodhearted man—placed as was his custom in his bedroom window which looked toward the southeast—the dangerous rocks. A light which burned all night—and no doubt, a prayer for all on the high seas, slept peacefully—to find in the morning the brave ship Sagunto wrecked at his very door and the crew perished from cold and fatigue and terror with safety and warmth and comfort so near at hand.

Beside their would-be benefactor sleep the fourteen bodies which he buried and his epitaph hallows them all.

The sea wall which connects Haley's with Malaga island is another monument to his nurturing energy and love for the fisherman and sailor.

Cedar island which lies near Haley's and Malaga owes its name to the three stunted cedars which grew upon it and were the only trees of any size upon the island.

Beyond Haley's and almost within a stone's throw lies Appledore, the great island of the group, called for many years Hog island from the fanciful resemblance to a hog's back rising out of the water, but this inelegant name is now seldom heard and the more euphonious name of the old town which was bestowed thereon has become general. The island contains about 400 acres of land and one may still find upon the southerly side many traces of vanished humanity—for the ground is undermined with ancient graves and the ruined cellars of houses wherein men and women lived more than a century ago are scattered here and there.

I like to think of the life at the Shoals as it might have been in these early days—I can well imagine the sturdy fisherman as he stood upon the thresh hold of his home and scanned the horizon with his trained eye—the fisherman garrulously mending the nets or tending the children—the children at their boisterous play—the idlers at the ale house—the cheerful cottages—the sparkling sea—the blue sky overhead.

I can see the slender, fair-haired maiden as she listened to the same sweet old fable story told by some fisherman lad—while the wave murmured a benediction or sobbed out a warning to them all.

Two miles northeast of Appledore lies a ledge of rock called Duck island and a pretty sight it is to watch the grace-

ful sea gulls dart and swirl in their dazzling whiteness about the black rock.

Almost a mile southwest of Star is White island, the seat of the U. S. lighthouse, but far better known as the early home of Celia Thaxter, although Appledore has the cottage wherein her later summers were spent and she lies at peace beside her father, mother and brother on Appledore.

At
